SENIOR MANAGER, DATA OPERATIONS | ENTERPRISE DATA MIGRATION | SaaS ONBOARDING & AUTOMATION

EXECUTIVE SUMMARY

Data operations and enterprise-migration leader with 13+ years owning end-to-end data migration and platform-onboarding lifecycles—discovery, legacy-data mapping, execution, and validation—across SaaS, aerospace, retail, and defense. Personally executed a full CRM-to-Housecall Pro data migration (67 tables / 1.3M rows reconciled; 9,439 jobs and 8,997 estimates migrated with deterministic linking) and has led enterprise data rollouts across 13–14 international markets. Fluent with structured data and APIs (CSV, JSON, REST), SQL and Python, and advanced Excel / Google Sheets; uses AI tools and automation (LLM agents, Make.com, n8n) to drive team efficiency and output quality. Known for injecting structure into ambiguity under compressed timelines, building repeatable playbooks, and translating messy technical environments into crisp narratives for C-suite sponsors. MBA, Technology Management (University of Washington); PMP; CSCP; MIT MicroMasters, Supply Chain Management.

CORE COMPETENCIES

Enterprise Data Migration • End-to-End Migration Lifecycle (Discovery → Validation) • Legacy Data Mapping & Reconciliation • Data Operations • SaaS Onboarding & Implementation • Technical Account Management • Structured Data (CSV, JSON, REST APIs) • SQL & Python • Advanced Excel & Google Sheets • AI Tools & Automation • Migration Playbooks & Repeatable Frameworks • Multi-Location / Multi-Market Rollouts • Risk, Blocker & Dependency Management • Cross-Functional Delivery (Product, Engineering, Sales, Support) • C-Suite & Executive Communication • Data Validation & QA • Speed to Value & Platform Adoption • Change Management & Training

PROFESSIONAL EXPERIENCE

GREEN CITY HEATING & AIR CONDITIONING | Auburn, WA

2024 – Present

Co-Owner & Strategic Advisor | Data & Technical Lead — Housecall Pro Migration & Automation

Co-own strategy and serve as data/technical lead for a Daikin Comfort Pro HVAC firm; led the company's full migration onto Housecall Pro and built the API-driven data pipelines and automation that made HCP its operational backbone.

- **End-to-End Housecall Pro Data Migration:** Owned the full migration lifecycle—discovery, legacy-data mapping, execution, and validation—from an undocumented WordPress CRM onto Housecall Pro after a failed ~\$50K ServiceTitan attempt; reconciled 67 source tables / 1.3M rows to a clean 20-table, 1.2M-row model and migrated 4,374 customers, 9,439 jobs, and 8,997 estimates.
- **Deterministic Data Engineering (APIs, JSON):** Engineered an HCP REST API and webhook pipeline (JSON/CSV) using an MD5 deterministic key to reliably join jobs, estimates, and customers—resolving the platform's cross-object linking gap and enabling validated, single-source reporting.
- **AI & Automation to Uplevel the Platform:** Layered AI-assisted automation (Make.com, n8n, LLM workflows) onto HCP—estimate follow-up, dispatch, invoice sync, reminders, and Gusto payroll—cutting manual admin ~60%, reclaiming 8+ hours/week, and reducing no-shows up to 60%.
- **Repeatable Playbook & Business Outcomes:** Documented the migration and automation as a repeatable playbook; delivered ~\$20K in first-year savings/productivity and stood up real-time KPI dashboards—upleveling platform utilization from basic to fully automated.
- **Adjacent Data Operations:** Ran a parallel Mailchimp migration (1,068 net-new contacts cross-referenced against HCP data) and built a top-1,200 customer segmentation by 18-month spend for targeted campaigns.

JUSTRUSH.AI | Greater Seattle Area

09/2024 – Present

Founder & Strategic Advisor | AI Automation × Data Integration × SaaS Implementation

Founded an applied-AI advisory and SaaS venture; build data-integration and automation platforms and deliver technical implementation and onboarding for SMB clients.

- **AI Tools & Automation:** Drive client team efficiency and output quality through AI tools and automation—LLM/agent workflows and API orchestration across Make.com, n8n, and HousecallPro.
- **Data Integration & Implementation:** Architect integration layers—deterministic data-linking pipelines and REST APIs (JSON/CSV)—and deliver end-to-end implementation and onboarding as repeatable, phased rollouts.
- **Analytics & Decision Support:** Build analytics (Advanced Excel, Google Sheets, SQL, Python)—models, KPI dashboards, and automated reporting—for real-time decision-making.

MORPHEUS.NETWORK | Toronto, CA

12/2023 – 09/2024

Head of Products (CPO) | SaaS Product & Platform Strategy

Led product for a blockchain-based SaaS platform for global supply chain digitization; directed strategy, roadmap, and user experience across the portfolio.

- **Product Strategy:** Built a multi-year roadmap and OKRs that expanded ARR by \$20M in 7 months through enhanced supply chain visibility.
- **Adoption & Experience:** Redesigned core user journeys to reach 80% user adoption and a 25% NPS increase; incorporated LLMs and predictive analytics that lifted renewals 15%.

- **Delivery & Expansion:** Introduced agile delivery that accelerated release velocity 66% and unlocked 6 new geographic markets.

AMAZON.COM, LLC | Seattle, WA

05/2017 – 12/2023

Senior Technical Product Manager — Data & Supply Chain Platform (Project Kuiper) | 04/2021 – 12/2023

Built and scaled the end-to-end supply chain data platform (ETES) for Amazon's satellite program under a compressed timeline, across a global supplier network.

- **Greenfield Build Under Pressure:** Delivered a full-stack supply chain data platform in ~7 weeks against a 28–36 week estimate—establishing core databases (BOM, supplier, COTS), data models, and BRDs where none existed.
- **Data Reconciliation & Validation:** Cut BOM/demand reconciliation ~85% and served validated, real-time Tableau reporting to 550+ internal and external stakeholders, including VP-level sponsors.
- **Multi-Source Integration & Executive Translation:** Consolidated dispersed data (Excel, S3, Smartsheet, engineering systems) into a single source of truth (forecast accuracy +32%), and translated it into narratives that drove supply-continuity decisions.

Senior Product Manager — Supply Chain Data & Automation | 07/2019 – 04/2021

Owned data and automation products for the food-manufacturing and logistics platform supporting Amazon's private-label operations.

- **Network & Analytics:** Reduced CapEx/OpEx by \$45M and built a Tableau analytics platform (25 automated dashboards) that saved 750+ hours annually.
- **Scripted Automation:** Built ScheduleBot (SQL + Selenium + Excel/VBA) that automated scheduling, cut errors 97%, and saved 915 labor hours; onboarded 100% of routes to the R4D logistics-visibility system.

Product Manager — Global Data Migration & Inventory Systems | 05/2017 – 07/2019

Directed global inventory/compliance data systems and multi-market platform rollouts across 13–14 international markets; led agile teams building ML-driven capabilities.

- **Global Multi-Market Rollout:** Rolled out the ARNOLD Lookup Table data platform across 13 markets (NA → AU, BR, CN, EMEA, IN, JP, MX)—building 9 Redshift tables, 9 Tableau dashboards, and data pipelines, and onboarding 3,200+ (later 5,000+) users.
- **Data Engineering at Scale:** Authored 150+ SQL queries and 25+ databases; connected disparate systems into seamless workflows across 14 countries, reducing customer risk 82%.
- **Adoption & Training:** Drove 90%+ adoption via 20+ training videos and localized content (22 languages via AWS Translate).

UNITED STATES MARINE CORPS | San Diego, CA

07/2011 – 05/2017

Global Supply Chain Operations | *Systems Integration & Data Governance*

Directed end-to-end military logistics across Asia-Pacific and CONUS, overseeing \$15B+ in assets and a \$12M+ annual budget.

- **Systems Integration:** Led implementation across six integrated logistics systems (ERP/WMS/TMS), raising inventory accuracy 40% and readiness KPIs 32%; scaled RFID/IoT tracking across three theaters.
- **Operations & Governance:** Improved supply availability 27%, reduced response delays 35%, and cut shrinkage 33% through data governance and stakeholder-aligned strategy.
- **Leadership:** Trained 400+ Marines on digital logistics and ERP/TMS systems; awarded 2× Navy & Marine Corps Achievement Medal and the Humanitarian Service Medal.

EDUCATION & CERTIFICATIONS

- Master of Business Administration, Technology Management — University of Washington, Seattle, WA
- Bachelor of Science, Transportation & Logistics Management — American Military University
- MicroMasters, Supply Chain Management — MITx | AI: Implications for Business Strategy — MIT Sloan Executive Education
- Certified Supply Chain Professional (CSCP) — ASCM | Project Management Professional (PMP) — PMI

AWARDS & HONORS

Navy & Marine Corps Achievement Medal (2) • Humanitarian Service Medal • Certificate of Commendation (2) • Certificate of Appreciation (2) • Letter of Appreciation (12) • 800+ Volunteer Hours
